Want More . . . DUCKS? GAME? FISH?

BRING THE WILD DUCKS SWARMING IN!!!!

ATTRACT AND HOLD FISH AND GAME IN ABUNDANCE!!!

"FOOD IS THE SECRET"

For days of real Outdoor Sport, plant their favorite NATURAL foods, proven foods, used successfully for over 65 years. Our Nurseries are, "The Pioneers in Making Places Attractive to Fins, Furs, Feathers and Folks." . . . Look for the name "WILD LIFE NURSERIES" for the best in planting materials. We have helped many Sportsmen, Hunting Clubs and Game Commissions throughout the United States and Canada, make their places favorite stopping and feeding grounds. Now is the time to plan and plant for this next season.

Let us help you . . . AND you will be helping yourself to enjoy the Outdoors and in being a . . . Conservationist. Plant this Spring, place part of your grounds into a refuge or reserve. Plan for years to come and your future generation. The goal does not have to be "The Limit" every time. Go out to enjoy the great outdoors, share it with others and enjoy one of our best natural resources.

DUCK STAMP SALES

In March 1934, Congress enacted legislation which created the Migratory Bird Hunting Stamp or more commonly called Duck Stamp. The first stamps went on sale August 14 of that year for \$1. By Congressional action the cost of the stamp was increased to \$2 in 1949-50 and to \$3 in 1959-60. The first year 635,001 stamps were sold and in 1935-36 the sales dropped to 448,204, but from there on, except for some minor ups and downs, the sales reached a peak of 2,369,940 in 1955-56, to 1958. The last three seasons the sales have dropped, last year being 1,727,534. This is still a lot of Gun Pressure, but I believe the hunters that are left are the true "Dyed in the Wool" hunters. However, with this increase in hunting pressure and the accompanying increase in number of ducks and geese killed each year, indicate clearly the great need and development of wetland areas. New or improved management areas are needed on the Wintering grounds in order to feed and protect the waterfowl populations during the critical Winter months. They are also vital in the major breeding areas in order to restore and preserve marsh areas. We will have to pull together, plan and plant natural habitat for our waterfowl to survive. Maybe it seems useless and our greed tells us the limits are too low, but with a little sacrifice and effort now, in a few years we can again enjoy good shooting and larger limits.
